The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4, 10, 12, 16, 23 and 26 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. The term "conventional" (claims 4, 10, 12, 16, 23 and 26; line 2) is vague, and indefinite as to the limitation intended.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5-14 and 17-28 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Degen et al. (U.S. Patent No. 5,290,446). See col. 2, lines 9-17; col. 5, lines 9-19; and col. 6, lines 9-45 and 56-63.

Art Unit: 1724

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 4, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Degen et al. in view of Pall et al. (U.S. Patent No. 4,523,995). Degen et al. discloses the claimed invention with the exception of the recited charge-modified media. Pall et al. discloses a charge modified filtration media of the type recited, and teaches (see col. 2, lines 67-68) that this media has enhanced particulate removal efficiencies. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the filter of Degen et al. with the charge modified filtration media of Pall et al., in order to obtain the advantages disclosed by this secondary reference for the filter of the primary reference.
